About Me

Hi, I'm Anat, a software engineering student passionate about using technology to solve real-world challenges. I specialize in both front-end and back-end development, with a keen interest in creating intuitive, user-friendly web applications.
Currently, I'm exploring innovative projects like an Online Blood Banking Management System, aiming to improve healthcare accessibility through technology.

Outside of my studies, I enjoy reading, learning new skills, and discovering the endless possibilities of the internet.

 I'm always looking to collaborate on meaningful projects. Let's connect!
